## SKILLS

### LANGUAGES

JavaScript  
C++  
OOP

### FRAMEWORK AND LIBRARY

- ReactJs
- Node Js / Express Js
- Redux / Redux Toolkit
- Next Js
- Bootstrap
- Tailwind CSS
- Material UI

### DATABASES

- MongoDB

### TOOLS

VS Code  
MS Office  
Dev C++

### SOFT SKILLS

Debate Teaching  
Team  
Building  
Communication  
Public Speaking

## EXPERIENCE

MERN stack developer with a strong track record of delivering high-quality web applications. Proficient in MongoDB, Express.js, React.js, and Node.js, with a deep understanding of best practices in software development. Skilled in designing modular architectures, optimizing performance, and ensuring security in MERN projects. Proven ability to collaborate effectively in cross-functional teams and drive projects to successful completion.

## PROJECTS

### FIT CLUB

The Modern Fit Club is a physical health application where users can get tips for physical health maintenance.  
• Built using the MERN stack, which includes MongoDB, Express.js, React.js, and Node.js.  
• This project leverages several modern technologies and tools such as JWT (JSON Web Tokens) for authentication, Redux Toolkit for state management, and google console for real-time database capabilities.

### LMS BECODEMY

The lms becodemy project built with the MERN stack is a comprehensive web application designed for both admin as well as .

- Having functionality to enroll through the web.
- UseState hook manages the form's state, ensuring data synchronization with the user interface.
- Axios sends requests to backend. Express and node JS handles

### ADMIN PANNEL

The "Admin pannel" project built with the MERN stack is a robust web application designed to facilitate online shopping by providing admin with a seamless experience to add, delete, and modify items in their shopping cart, set prices, and generate a total bill.

- UseState is used to manage CRUD operations.
- React context API to manage state management
